>As I see it, since the 44 network is subdivided (2nd octet) by US state or
>country, we've practically got subnetting. Or at least a darn good start.
>I know that Kansas is further divided into six regions (44.122.1 is north
>east), and I've heard that some are suggesting changing that to
>county-by-counting dividing (can you say subnet?).

>IMHO, if you move far enough that your IP number doesn't have the "look and
>feel" of those around you, then you need to request a new IP number.
